

Endpoint Management Asset Inventory - Purging Inventory History

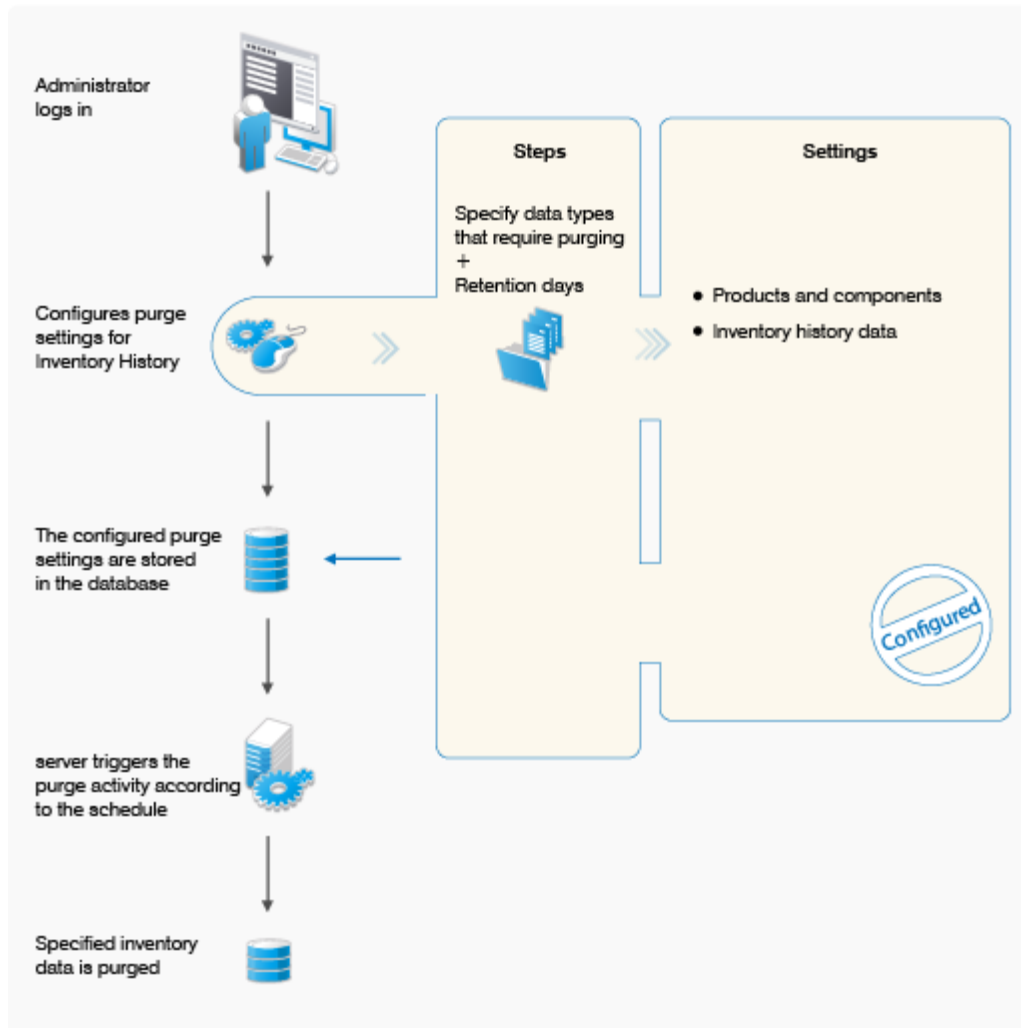

Inventory data can accumulate over a period of time, increasing the Endpoint Management database size and slowing down the inventory reporting process. To maintain database efficiency, you should purge the historical inventory data regularly. This process of deleting unwanted, obsolete inventory data is called purging the inventory history.

Prerequisites

- ♦ Ensure that you have a knowledge of the company policy to decide on the kind of data that is to be retained or purged.

Workflow Diagram

Procedure

- 1 In Endpoint Management Console, click **Configuration**.
- 2 Under Management Zone Settings, click **Inventory**, then click **Purge Inventory History**.
- 3 Click **Purge Inventory History**.
- 4 Configure the Purge History Settings:
 - ♦ **Remove the deleted products and components older than x day(s):** Specify the number of days after which to purge deleted product and component data. The default value is 180 days.
 - ♦ **Remove the inventory history data older than x day(s):** Specify the number of days after which to purge the inventory history. The default value is 180 days.

For example, if you enter 190 days as the value, all data older than 190 days is deleted.
- 5 Click **OK** to save your settings.
