Components & Editions	4
ZENworks Limited Editions	4
Standard, Professional, and Enterprise Editions and Add-On Packs	5
New Features	7
InstallShield 2011	7
System Requirements	10
Resolved Issues	11
AdminStudio 10.0 SP2	11
AdminStudio 10.0 SP1	13
AdminStudio 10.0	14

Introduction

For Novell ZENworks Configuration Manager (ZCM) 10 and 11 customers, Flexera Software, Inc. and Novell have agreed to provide the AdminStudio Standard Edition, the basic version of the AdminStudio solution, at no additional cost to ZCM 10 and 11 customers. AdminStudio Standard Edition provides a cost-effective way for software packagers to migrate applications to Windows Installer. It enables control over MSI packaging, customization, and distribution activities, helping organizations rapidly and reliably package and deploy applications. For customers who require more than entry-level functionality, AdminStudio Professional and Enterprise Editions all include functionality to handoff packages to Novell ZENworks Configuration Manager (ZCM) 10 and 11. Visit the [Novell Web site](#) for more details.

Getting Started

AdminStudio 10.0 has a redesigned Start Page which makes it easy for you to quickly get started evaluating and using AdminStudio. The new Start Page's tabbed interface provides process information on how to perform the following key procedures using AdminStudio:

Procedure	Procedure
 Test for Application Compatibility	Use Compatibility Solver to test for application readiness on Microsoft Windows 7 (32-bit and 64-bit) and Windows Server 2008 and 2008 R2 platforms, as well as compatibility with Internet Explorer 8.0.
 Migrate to Application Virtualization	Migrate your application portfolio into virtual applications that are ready for deployment within the enterprise.
 Migrate to Windows Installer	Migrate legacy setups to deployable Windows Installer packages.
 Set Up Infrastructure	Perform one-time setup tasks: connect to an Application Catalog, prepare virtual machines for use in automated repackaging and testing, configure e-mail, create a Compatibility Solver database, and download Compatibility Solver reports.

Important • It is highly recommended that you spend some time reviewing the flowcharts on the AdminStudio Start Pages to become familiar with AdminStudio's new and existing capabilities.

As an example, the **Migrate to Application Virtualization** tab is shown below. ,

Figure 1: Migrate to Application Virtualization Tab of AdminStudio Start Page

Each tab explains how to perform a key AdminStudio procedure. Each procedure is broken down into several tasks, which are identified at the top of each column.

As you review these flowcharts, note the following:

- **Steps**—Review the numbered steps in each task.
- **Learn more**—Click on **Learn More...** to launch detailed help topics on how to perform each step.
- **Tool launch buttons**—To get started performing a task, click the button at the bottom of the column to launch the appropriate AdminStudio tool.
- **Create New Project**—Click this button to create a new Project, which you can use to guide you through the steps in a procedure.

Components & Editions

In addition to the ZENworks Edition, AdminStudio 10.0 SP2 is also available in Standard, Professional, and Enterprise Editions. This section lists the AdminStudio components that are included in each Edition.

- [ZENworks Limited Editions](#)
- [Standard, Professional, and Enterprise Editions and Add-On Packs](#)

ZENworks Limited Editions

AdminStudio provides two ZENworks Limited Editions:

- [ZENworks Edition for ZENworks 10 and 11 Users](#)
- [ZENworks Edition for ZENworks 7 Users](#)

ZENworks Edition for ZENworks 10 and 11 Users

The AdminStudio 10.0 SP2 ZENworks Edition for Novell ZENworks Configuration Manager (ZCM) 10 and 11 customers includes all of the features of AdminStudio Standard Edition, the basic version of the AdminStudio solution. For more information, see [Standard](#) Edition.

ZENworks Edition for ZENworks 7 Users

AdminStudio 10.0 SP2 ZENworks Edition for ZENworks 7 users is a customized version of AdminStudio that allows system administrators to rapidly prepare reliable Windows Installer (.msi) software packages for distribution across their enterprises. AdminStudio enables companies to take full advantage of the benefits of Windows Installer and reduces total cost of ownership by simplifying the installation, customization, and management of applications. AdminStudio 10.0 SP2 ZENworks Edition for ZENworks 7 users includes the following components:

- **Repackager**—Use to repackage and convert Novell ZENworks projects (.axt/.aot) into Windows Installer packages. Full Repackager functionality is provided, except for InstallScript MSI Conversion.
- **Distribution Wizard (Customized for ZENworks)**—Prepare a Windows Installer package for distribution via ZENworks desktop application distribution or via ZENworks server distribution.
- **Tuner**—You can use Tuner to quickly create transforms (.mst), including Response File transforms, to customize software already in the Windows Installer format and automatically validate that any changes conform to Microsoft guidelines.

Standard, Professional, and Enterprise Editions and Add-On Packs

AdminStudio 10.0 SP2 is available in Standard, Professional, and Enterprise Editions. You also have the option of purchasing an additional Virtualization Pack and Application Compatibility Pack. Also, functionality varies depending upon whether you have purchased the Per Admin pricing model or the Per Desktop pricing model

Edition	AdminStudio	Virtualization Pack	Application Compatibility Pack
Standard	<p>Tools</p> <ul style="list-style-type: none"> ● Repackager ● Distribution Wizard ● FlexWrap ● InstallShield 2011 ● Tuner ● Application Isolation Wizard <p>Functionality</p> <ul style="list-style-type: none"> ● Windows Installer repackaging ● Windows Installer customization ● Preparation for distribution 	<p>Tools</p> <ul style="list-style-type: none"> ● Automated Application Converter (Single Application Version) ● Virtual Package Editor ● Microsoft App-V Assistant ● ThinApp Assistant ● Citrix Assistant <p>Functionality</p> <ul style="list-style-type: none"> ● Convert to virtual applications ● App-V package editing 	N/A

Edition	AdminStudio	Virtualization Pack	Application Compatibility Pack
Professional	<p>Tools</p> <p>Same as Standard, plus:</p> <ul style="list-style-type: none"> ● ConflictSolver ● Application Manager ● OS Snapshot Wizard ● QualityMonitor ● Predeployment Test <p>Functionality</p> <p>Same as Standard, plus:</p> <ul style="list-style-type: none"> ● Application management ● Testing, validation, and conflict testing ● Standard reporting 	<p>Tools</p> <p>Same as Standard, plus:</p> <ul style="list-style-type: none"> ● Automated Application Converter (Single Application Version) with Virtualization Suitability Testing <p>Functionality</p> <p>Same as Standard, plus:</p> <ul style="list-style-type: none"> ● Test for virtualization suitability ● Store App-V data in Application Manager ● App-V package testing, validation, and conflict testing ● Automated conversion of legacy packages to Windows Installer 	<p>Tools & Functionality</p> <p>Compatibility Solver with the following functionality:</p> <ul style="list-style-type: none"> ● Project-level compatibility assessment and cost/effort reporting for all applications ● Application testing and reporting for Windows 7 (32- and 64-bit versions) ● Auto-fixing for Windows 7 and Windows Server 2008 and 2008 R2
Professional Complete	Includes Professional Edition with both the Virtualization Pack and the Application Compatibility Pack .		
Enterprise (Per Admin)	<p>Tools</p> <p>Same as Professional, plus:</p> <ul style="list-style-type: none"> ● PackageExpert ● OS Security Patch Wizard ● Job Manager ● Report Center ● Software Repository ● Security Console <p>Functionality</p> <p>Same as Professional, plus:</p> <ul style="list-style-type: none"> ● Application Readiness Dashboard ● Process and workgroup management features 	<p>Tools</p> <p>Same as Professional, plus:</p> <ul style="list-style-type: none"> ● Automated Application Converter (Multiple Application Version) with Suitability Testing <p>Functionality</p> <p>Same as Professional, plus:</p> <ul style="list-style-type: none"> ● Automated conversion of multiple packages to virtual applications ● Automated conversion of multiple legacy packages to Windows Installer ● Application Readiness Dashboard (Including Virtualization Reports) 	<p>Tools & Functionality</p> <p>All of the Compatibility Solver functionality available in Professional, plus:</p> <ul style="list-style-type: none"> ● Detailed compatibility assessment reports ● Application testing and reporting for Windows 7 (32- and 64-bit versions), and Windows Server 2008 and 2008 R2

Edition	AdminStudio	Virtualization Pack	Application Compatibility Pack
Enterprise (Per Admin) Complete	Includes Enterprise Edition (Per Admin) with both the Virtualization Pack and the Application Compatibility Pack .		
Enterprise (Per Desktop)	Tools & Functionality Same as Enterprise (Per Admin)	Tools & Functionality Same as Enterprise (Per Admin)	Tools & Functionality All of the Compatibility Solver functionality available in Enterprise (Per Admin) , plus: <ul style="list-style-type: none"> • Testing can be done on groups of applications at a time Web Application Compatibility Pack (Optional Add-On) <ul style="list-style-type: none"> • Test compatibility of web applications with Internet Explorer 8 browser • Test integration of desktop application with Internet Explorer 8 browser
Enterprise (Per Desktop) Complete	Includes Enterprise Edition (Per Desktop) with both the Virtualization Pack and the Application Compatibility Pack .		
	<i>Note • Web Application Compatibility Pack is available as an optional add-on feature.</i>		

New Features

AdminStudio ZENworks Edition for Novell ZENworks Configuration Manager (ZCM) 10 and 11 users includes the following new feature:

- [InstallShield 2011](#)

InstallShield 2011

AdminStudio 10.0 includes InstallShield 2011, which offers many new features and enhancements that will help you use the latest technologies and save time on everyday tasks. New features include:

- **Integration with Team Foundation Server**—If you use Team Foundation Server, you can now take advantage of the new tight integration with InstallShield as you develop, maintain, build, test, and deploy your products and their installations.

- **Custom source locations for prerequisites**—You can now specify custom source locations for InstallShield prerequisites. This flexibility enables you to easily add to your projects InstallShield prerequisites that are stored in source code control and to share a common set of prerequisites across multiple machines.
- **Emphasize your brand**—You can now specify a custom icon and custom version resource properties for setup.exe and update.exe.
- **Streamline build process**—You can now streamline your build process by specifying commands that run before, during, and after builds.
- **64-bit support**—Several new advancements in InstallShield 2011 make it easier for you to create 64-bit installations or 64-bit App-V packages.
- **Standalone Build tool**—InstallShield 2011 includes a command-line Standalone Build tool that enables you to install on build machines only the part of InstallShield that builds the installations, plus any redistributables that you want to include. The Standalone Build is now included with the Professional and Premier editions of InstallShield. If you need extra licenses of the Standalone Build, you can also now purchase them separately.

Detailed List of New Features

The following table provides a more detailed list of the new features included in InstallShield 2011:

Category	Feature
Enhanced Prerequisites Support	<ul style="list-style-type: none"> ● New InstallShield prerequisites for SQL Server 2008 R2 Express, SQL Server Native Client, Visual C++ 2010, and other redistributables ● Ability to specify a search path for InstallShield prerequisites; path variable and relative path support for source locations of prerequisite files
Enhanced Microsoft Integration/Support	<ul style="list-style-type: none"> ● Integration with Team Foundation Server (TFS) ● Microsoft SQL Server 2008 R2 Support ● Ability to import Visual Studio setup and merge module projects into existing InstallShield projects; improvements for the project converter ● Windows Installer 5 support for configuring Windows Service permissions
Installer Design Enhancements	<ul style="list-style-type: none"> ● New hyperlink control for Windows Installer-based dialogs ● Ability to specify a custom icon and custom version resource properties for setup.exe and update.exe ● Ability to specify commands that run before, during, and after builds ● Ability to set an expiration date for setup.exe ● Support for looping through image billboards in Basic MSI projects

Category	Feature
64-Bit OS Support	<ul style="list-style-type: none">• Ability to create 64-bit Microsoft App-V packages• 64-bit support for Repackager• Support for 64-bit managed-code custom actions• Support for 64-bit .NET installer classes and COM interop
FlexNet Connect	<ul style="list-style-type: none">• New FlexNet Connect 12.01 redistributables available
Other	<ul style="list-style-type: none">• Predefined system searches for SQL Server 2008 Express SP1 and Adobe Reader 9• Ability to override path variables for a release• Ability to configure MIME types for IIS web sites, applications, and virtual directories• Ability to overwrite existing IIS application pool or only create it if it does not exist

For more information on the new features and enhancements in InstallShield 2011, see the [InstallShield 2011 Release Notes](#).

System Requirements

The following table lists the recommended system configuration for a machine running AdminStudio 10.0 SP2 ZENworks Edition.

Item	Description
Processor	32-bit (x86) or 64-bit (x64) processor at 1 GHz or greater
RAM	1 GB
Hard Disk	1.1 GB
Display	Designed for XGA at 1024 x 768 resolution or higher
Operating System	Windows 7 SP1, Windows 7, Windows Vista, Windows XP (SP1 or later is recommended), or Windows Server 2003 or later.
Browser	Microsoft Internet Explorer 5.5 or later
Privileges	Administrative privileges on the system

Note • The first time you launch an AdminStudio ZENworks Edition tool, you will be prompted to log in to a ZENworks eDirectory server or a ZENworks Configuration Management server. After a successful login, you will not be prompted to login again. For more information, see the AdminStudio ZENworks Edition Installation Guide.

Resolved Issues

This section describes the resolved issues in the following versions of AdminStudio:

- [AdminStudio 10.0 SP2](#)
- [AdminStudio 10.0 SP1](#)
- [AdminStudio 10.0](#)

AdminStudio 10.0 SP2

This section describes the customer issues that were resolved in AdminStudio 10.0 SP2:

Issue Number	Issue Summary
IOA-000062809	When using Automated Application Converter to perform automated repackaging of a legacy setup on a Windows 7 virtual machine, extra files in the Windows\System32 directory are captured, making the repackaging process take longer and resulting in larger Windows Installer and virtual packages. These extra files from the System32 directory are not required and should not be captured.
IOA-000064729	In the Application Compatibility Dashboard report, the count of packages that fall into the No Issues and Not Tested categories in the pie charts was not calculated correctly.
IOA-000064837	The detail reports that are opened by clicking on one of the categories in the Internet Explorer 8 Presentation Compatibility pie chart on the Application Compatibility Dashboard do not display any data for web sites.
IOA-000065159	After running the AdminStudio 10.0 SP1 installer, the Application Readiness Dashboard reports could no longer be viewed on the Report Center tab of AdminStudio Enterprise Server.
IOA-000065163	The Transform Status property, which is displayed on the Packages tab of Automated Application Converter, should indicate whether No Transforms , One Transform , or Multiple Transforms are associated with a package. When a package is initially added, the Transform Status property is correctly updated. However, when opening a saved Automated Application Converter project file, the Transform Status property for all packages is set to No Transforms even for packages with associated transforms.
IOA-000065237	After running the AdminStudio 10.0 SP1 installer on an installation of AdminStudio 10.0 Professional, and upgrading the Application Catalog to 10.0 SP1, the Process Assistants tab (formerly the Projects tab) was no longer displayed.

Issue Number	Issue Summary
IOA-000065270	AdminStudio virtual conversion process was using Windows XP style paths for user profile locations when needed in INI files contained in App-V packages. This could cause problems for a small sub-set of applications when running on Windows Vista or newer. Now default behavior is to use Windows Vista/7 style profile paths. This can be changed by modifying the AppV.xml configuration file.
IOA-000065271	<p>The following enhancements were made to the Application Manager configuration file support for import:</p> <p>General Section</p> <ul style="list-style-type: none"> ● RefreshExtendedAttributesSchema—Values are Y or N. The default value is N. ● ExtendedAttributesConfigFile—The file path to the Extended Attributes XML file. <p>These two parameters can be used to specify a new Extended Attribute schema and to have it loaded into the Application Catalog.</p> <hr/> <p><i>Note</i> • Do not delete extended attributes that are already in use in the database (those that already have data specified).</p> <p>Package Section</p> <ul style="list-style-type: none"> ● ApplicationName—Name of application to add this package to. If an application does not exist, it will be created. Also, each application name in a given group should be unique. ● SetupName—This property is now applicable for Windows Installer packages. ● EA1, EA2, ...—Use this property to specify a value for a particular Extended Attribute. Separate the Extended Attribute name and value with a semicolon. <p>OtherSetupFile Section</p> <p>The section name for the Other Setup Type section was change from OtherFile to OtherSetupFile.</p> <hr/> <p><i>Note</i> • Also, the Group field now allows multiple groups to be specified (separated by semi-colons).</p>
IOA-000065308	If the Build Windows Installer Packages option on the Project Options dialog box of Automated Application Converter is set to True , Automated Application Converter will crash when converting a Windows Installer package to an App-V package, and the conversion fails.

AdminStudio 10.0 SP1

This section describes the customer issues that were resolved in AdminStudio 10.0 SP1:

Issue Number	Issue Summary
IOB-000060588	AdminStudio 10.0 Professional Edition with Virtualization Pack and AdminStudio 10.0 Professional Complete Edition did not include the Application Manager Run Virtualization Readiness option and the Virtualization Suitability node.
IOA-000063478	Unable to perform a bulk import of packages into the Application Catalog using a configuration file when a package count was not present in the [General] section of the file.
IOA-000062805	If you attempt to use the Process Template Editor to edit a Workflow after a Project using that Workflow has been created, the Process Template Editor will crash.
IOA-000062513	When using Automated Application Converter to directly convert a Windows Installer package to a virtual package, if that Windows Installer package had an associated transform that includes files, an Application File not found warning was generated.
IOA-000061968	Even after activating AdminStudio, you were still being prompted to activate Configuration Manager Web Console each time it was launched.
IOB-000060317	If you install AdminStudio 10 on a machine that has a French language Windows operating system, you are unable to evaluate Compatibility Solver. Whenever you launch Compatibility Solver in evaluation mode, a license conversion error is displayed and you are prompted to activate it.
IOA-000061471	The documentation for Error -4310 needs to mention that this error also occurs if the virtual machine AutoRepack_Base snapshot was taken before before the machine was powered off.
IOA-000055387	When AdminStudio is activated through a license server using a concurrent license, the user was unable to launch Remote Repackager.

AdminStudio 10.0

This section describes the customer issues that were resolved in AdminStudio 10.0:

Issue Number	Issue Summary
IOA-000060712	Allow to configure the VFS path for the App-V package.
IOA-000060374	Automated Application Converter crashes soon after launching on a Customer's Windows 7 64-bit VM image.
IOA-000060060	Windows Installer Converter is acting case-sensitive when creating App-V package while dealing with the Path Env variable.
IOA-000059813	The Standalone Repackager Start page includes links to help topics on application virtualization, which is not supported.
IOA-000059707	Unable to enter a hyphen "-" character in user name or email fields.
IOA-000059207	Repackager fails to separate the shortcut target from its parameters when the target points to a non-executable.
IOA-000059079	Automated Application Converter crashes when publishing to Microsoft System Center Configuration Manager.
IOA-000058955	File extension parameters are not captured correctly for dynamic data exchange (DDE) shortcut created by Microsoft Snapshot Viewer 10.0 (Access exported SNP report file viewer).
IOA-000058951	Customer installs and activates AS 9.5 Professional, but the Help About view displays incorrect product name, but correct version; company and contact information, but no product serial number.
IOC-000085871	The SQL Script AS_System_schema.sql results in syntax error on SQL Server 2008, when run manually.
IOA-000058502	Error message LoadInjectionDriver failed. Error: 123
IOA-000058398	Repackager fails to detect some empty folders created during the install of Octave and also during install of Matlab.
IOA-000058272	Changes made to .irp files are not effective while building/creating a .msi/.ism file unless you click the Save icon.
IOA-000057806	Unable to find JRE when using DSC with JRE on a separate package.
IOA-000057675	Repackager's command line option -app launches Repackager with path enclosed in double quotes
IOA-000057545	Need to ship 64-bit version of SQL Express with AdminStudio installer to make it work on 64-bit machines

Issue Number	Issue Summary
IOA-000057189	Automated Application Converter should have its own options.ini file because it can cause conflicts with the global options.ini used in large organizations.
IOA-000056847	An unknown error occurred when performing a ZENworks accessAXT conversion.
IOA-000053875	AdminStudio needs updated .cub files. It is currently shipping with .cub files from Windows Installer 2.x.
IOB-000058916	In Repackager, the Editor project location is truncated if a '.' is included in the path to store files in the wizard.
IOA-000053221	When specifying port in AES URL (in AdminStudio 9.5) for DefaultDatabase, AdminStudio workflows do not complete.
IOA-000053126	Unable to create the MSI_Package Folder that is now included when building a new legacy package in Repackager.
IOA-000053043	Install AES button is disabled on Windows Server 2008 machines.
IOA-000052968	InstallShield installation from AdminStudio 9.5 requires ldapssl.dll and ldapsdk.dll.
IOA-000052954	Shortcuts get included even after excluding them in the Repackager view
IOA-000052047	When specifying port in AES URL for DefaultDatabase, AdminStudio workflows do not complete.
IOA-000051973	After reinstallation, activation, ZENworks Edition shows up as "Enterprise".
IOC-000080628	The Windows 7 and Windows Server 2008 operating systems are not available in OS list under Profile Requirements view of Citrix XenApp Assistant.
IOA-000047618	Customer requested that the AdminStudio serial number be removed from splash screens.
IOC-000070700	Request for better upload logging for file uploads.
IOC-000063076	Branching with a non-required Single Selection causes exception on edit data.
IOC-000061482	Repackaging Wizard does not check specified Product Name to see if it contains invalid characters.

Issue Number	Issue Summary
IOA-000028499	Give customers the option to hide the product serial number on the AdminStudio Help / About dialog box.
IOC-000046951	Choosing an existing AS Shared folder during AS 7 installation corrupts the ACL.
