

# Novell SecureLogin 7.0 Service Pack 3 Hotfix 5 Readme

March, 2013

Novell®

Novell SecureLogin is a single sign-on application. It consists of multiple, integrated security systems that provide authentication and single sign-on to networks and applications. It provides a single entry point to the corporate network and its user resources, increasing security while enhancing compliance with corporate security policies. Novell SecureLogin also eliminates the requirement for users to remember multiple usernames, and passwords and automatically enters them for users when required. For detailed information on Novell SecureLogin, visit the [Novell SecureLogin product Web site](#).

Novell SecureLogin 7.0 Service Pack 3 Hotfix 5 improves usability, and resolves several previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure our products meet all your needs.

## 1 What's New?

Novell SecureLogin 7.0 Service Pack 3 Hotfix 5 includes the following enhancements and software fixes.

---

**NOTE:** For the list of new features, software fixes and enhancements in SecureLogin 7.0 Service Pack 3, see the [Novell SecureLogin 7.0 Service Pack 3 Release Notes](#).

---

- ◆ [Section 1.1, "Enhancement," on page 1](#)
- ◆ [Section 1.2, "Software Fixes," on page 2](#)

### 1.1 Enhancement

#### 1.1.1 Limit Concurrent Connection Feature Supports Inheritance

A new attribute, `Protocom-SSO-ConcurrentConfig`, has to be added to control the inheritance of settings from a higher level container, organizational unit or country. The new attribute can be added using the schema extension tool. For more information, see [Limit Concurrent Connections](#). (BUG 716406)

## 1.2 Software Fixes

### 1.2.1 SecureLogin does not Store the Network Credentials in the GINA Mode on a Non-English Windows 7 Machine

SecureLogin now recognizes the localized system information and stores the network credentials in the GINA mode on a non-English Windows 7 machine. (BUG 804418)

### 1.2.2 SecureLogin does not do a Seamless Login to ZCM Agent and also does not Display a Login Window when you Login to SecureLogin

SecureLogin does a seamless login to ZCM agent when you log in to SecureLogin that is installed in the LDAP Credential Provider mode with eDirectory, as SecureLogin is integrated with the ZCM agent. (BUG 580418)

## 2 System Requirements

For detailed information of supported environments, see “Supported Environments” in the [Novell SecureLogin Quick Start Guide](#).

## 3 Installing SecureLogin 7.0 Service Pack 3

To install SecureLogin 7.0 Service Pack 3, see [Novell SecureLogin Installation Guide](#).

## 4 Known Issues

For detailed information of all the known issues for SecureLogin 7.0 Service Pack 3, see “Known Issues” in the [Novell SecureLogin 7.0 Service Pack 3 Release Notes](#).

## 5 Documentation

The complete documentation is available at, [Novell SecureLogin 7.0 SP3 Documentation Web Site](#).

## 6 Legal Notices
