

1 Documentation

The following sources provide information about Novell® ZENworks® Application Virtualization:

- ♦ [ZENworks Application Virtualization Documentation Web site \(http://www.novell.com/documentation/zav71/\)](http://www.novell.com/documentation/zav71/).
- ♦ [Novell ZENworks Application Virtualization Product Page \(http://www.novell.com/products/zenworks/applicationvirtualization/\)](http://www.novell.com/products/zenworks/applicationvirtualization/)

Novell ZENworks Application Virtualization 7.1a, a minor update from version 7.1, fixes a problem in which folders that were not referenced by the application packaging process would cause the application to crash.

2 Known Issues

This section contains information about ZENworks Application Virtualization issues that might occur.

- ♦ [Section 2.1, “Launching XREG.EXE Fails,” on page 1](#)
- ♦ [Section 2.2, “Using Search from the Help inside ZENworks Application Virtualization causes the application to crash,” on page 1](#)

2.1 Launching XREG.EXE Fails

This problem occurs if you attempt to run ZENworks Application Virtualization on a machine that does not have the Microsoft® .NET Framework installed.

Workaround: Download the [.Net 2.0 xlayer \(http://www.xenocode.com/Products/common/Xlayers/MSNet_x86_2.0.50727_2.xlayer\)](http://www.xenocode.com/Products/common/Xlayers/MSNet_x86_2.0.50727_2.xlayer) and copy it to the same directory as XREG.EXE.

2.2 Using Search from the Help inside ZENworks Application Virtualization causes the application to crash

The ZENworks Application Virtualization packager might crash if you perform a search using help from inside the application.

Workaround: To search the help, use the Help link from the Start Menu (*Start > Programs > ZENworks Application Virtualization 7.1 > ZENworks Application Virtualization 7.1 Help*) instead of using the *Help* link in the ZENworks Application Virtualization application.

3 Documentation Conventions

In this documentation, a greater-than symbol (>) is used to separate actions within a step and items in a cross-reference path.

A trademark symbol (® , TM, etc.) denotes a Novell trademark; an asterisk (*) denotes a third-party trademark
